

YOUR INVITATION TO AN IMPORTANT BRIEFING ON ASBESTOS MINE POLLUTION AND REHABILITATION

There are hundreds, if not thousands, of abandoned asbestos mines and shafts in various regions around the country. Many of them continue to pollute the environment, causing long term health threats to surrounding communities.

The Department of Mineral Resources has appointed the Council for Geoscience and Mintek to manage the Derelict and Ownerless Mine Rehabilitation programme.

Herman Cornelissen, Head: Sustainable Development at Mintek, a global leader in minerals processing and metallurgical engineering products and services, has kindly agreed to present

A comprehensive update on the

SOUTH AFRICAN ASBESTOS MINE REHABILITATION PROJECT

At the Annual General Meeting of the Kgalagadi Relief Trust

VENUE: WANDERERS CLUB, ILLOVO

TIME: 13.30 FOR 14.00

DATE: MONDAY, 14 NOVEMBER 2016

Herman (who has an honours degree in environmental management and an MBA, is currently studying for an MSc (Mining Engineering) at the WITS School of Mining) has prepared a comprehensive illustrated presentation covering:

- **A brief history and legacy of asbestos mining in South Africa;**
- **Government's programme of rehabilitation (including lessons learnt and persistent challenges);**
- **Completed rehabilitation works; and**
- **A look to the future**

He will also take questions.

All are welcome!

Please RSVP (by 10 November 2016) to:

Amanda Baadjies
